## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.  
PCT/US03/07074**V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. STATEMENT**

Novelty (N)	Claims <u>1-37</u>	YES
	Claims <u>NONE</u>	NO
Inventive Step (IS)	Claims <u>1-37</u>	YES
	Claims <u>NONE</u>	NO
Industrial Applicability (IA)	Claims <u>1-37</u>	YES
	Claims <u>NONE</u>	NO

**2. CITATIONS AND EXPLANATIONS**

Claims 1-37 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest the instant claimed tri-aryl compounds, consisting of a central tetrazole moiety substituted by at least one heteroaryl moiety and a second aryl or heteroaryl moiety. The closest art of record, the CAS listing of the Kitaeva et al journal article, teaches similar tri-aryl compounds, but does not disclose the specific tetrazole-aryl compounds as instantly claimed.

Claims 1-37 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made in the pharmaceutical industry and has utility as glutamate receptor modulators, useful for treating anxiety, depression, psychosis, etc.
